Kindergarten

In keeping with the activity-based co-operative learning occurring in our classroom, we use a system of shared supplies for kindergarten.

It is hoped that this will be more economical for the children since such items as paints, markers and pencil crayons can be shared. Having only a few containers of glue open at one time will help prevent drying out and plugging of lids.

Rather than each child having their own supplies it will be more convenient to have portable containers of supplies as children work together and move to various work stations during the day. This will help to keep our room organized and eliminate the problem of lost or misplaced supplies as each item would have a container and it wouldn't matter who it belonged to at clean-up time.

A record of purchases will be kept and parents are welcome to examine this at any time.
