

Supporting Math Learning at Home

Dear Parents/Guardians,

January 2020

Developing and strengthen deep understandings and processes in Math is important in Western School Division. We appreciate all of the additional support parents provide with learning throughout the school year. In order to provide some continuity and consistency between school and home numeracy learning we are sending home a Math Learning Resource package with each K-8 student.

Inside the package, you will find:

- 4 double sided math mats
- A variety of math tools to cut out and use
- a dry erase marker with an eraser
- a plastic protective sleeve – to use as an erasable cover for the mats and as a storage place for all of the materials

In the days ahead, your child's teacher will provide guidance and activities to utilize the materials. In the event that you child is involved in Temporary Remote Learning activities these materials will also be vital in supporting the math lessons. We encourage you and your child to use the materials for any additional practice between lessons and any other math activities you find or create on your own.

**Additional ideas and activities available
in school newsletters and websites.**

Check them out!
